McKinsey Problem Solving Model

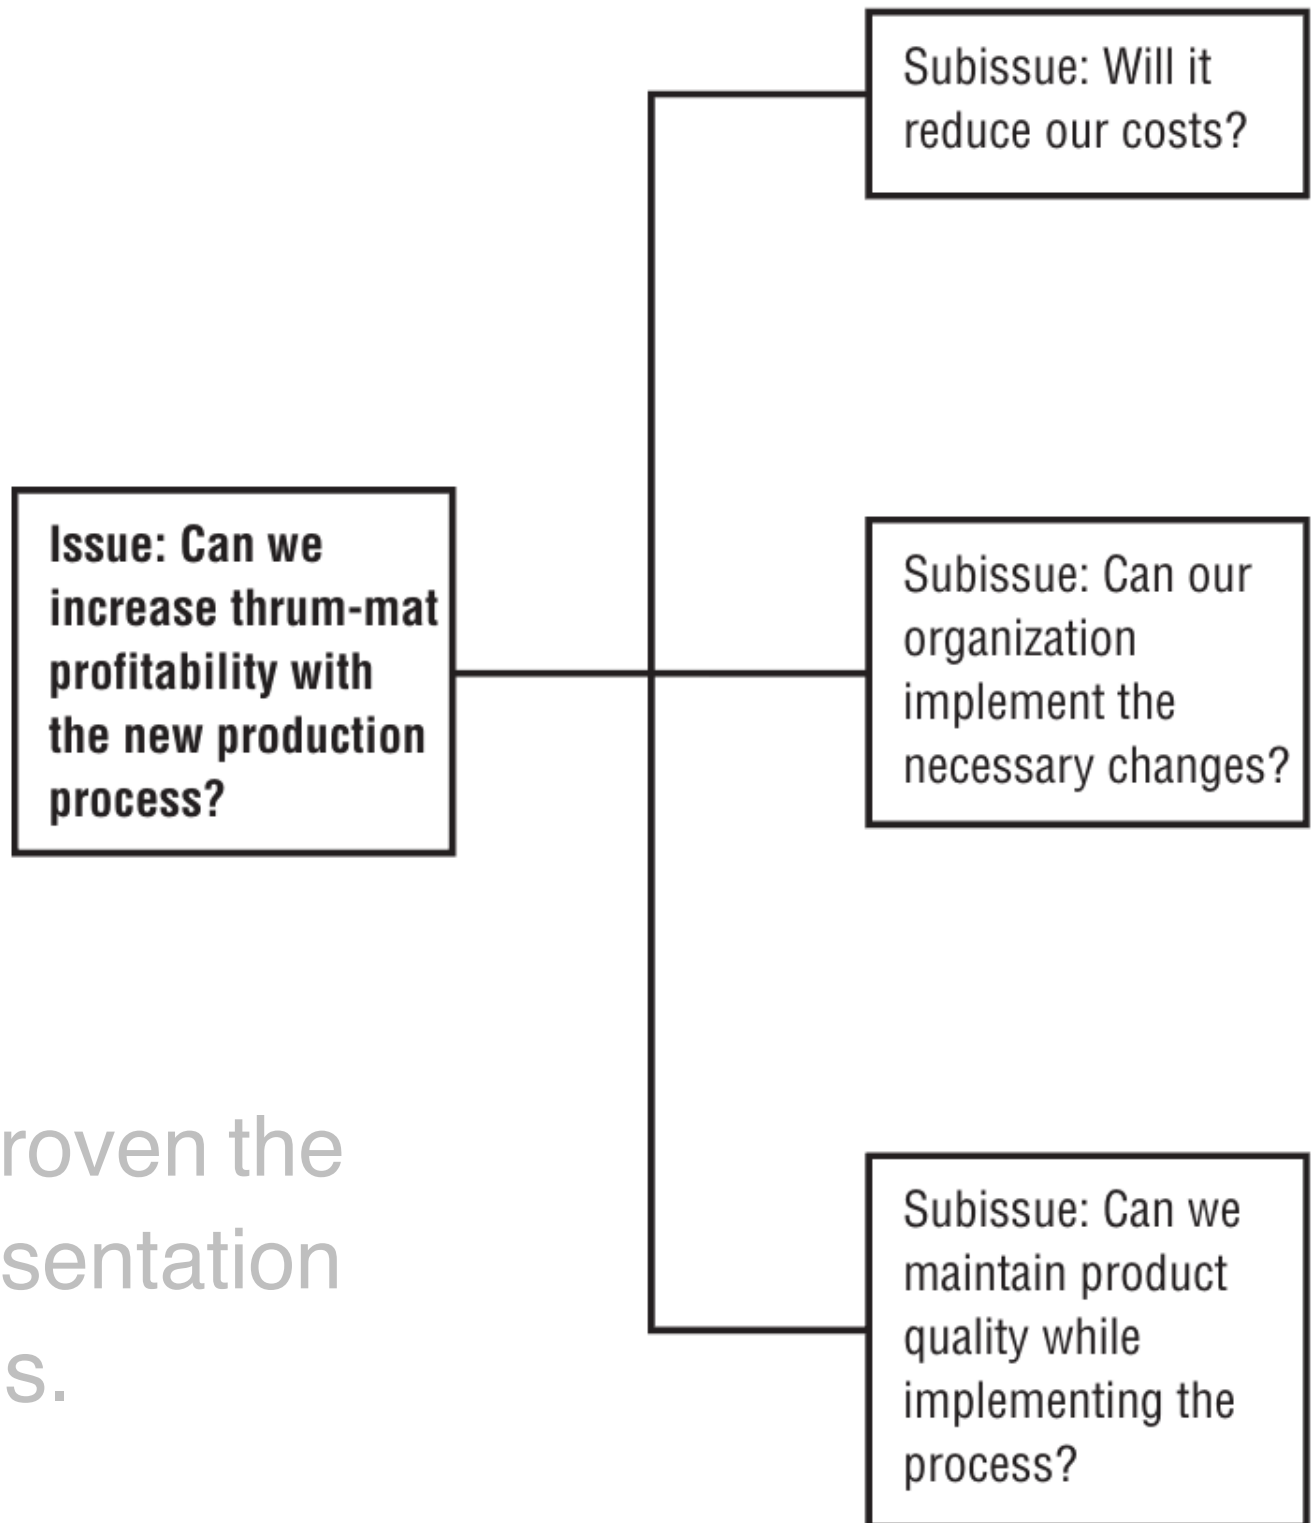

Structure

MECE driven Structure

- Be structured – logical, easy to follow - use your hypothesis!
- Use MECE issues and sub-issues. Put together exhibits that prove your point & fit them on the issue tree.
- Elevator Test – 30 seconds... KISS
- One message per chart - Make change happen
- Death by PPT

Issue Tree

Your analysis has proven the Issue Tree. The presentation will be based on this.

First Slide... Second Slide

Acme Widgets can lower the marginal cost of its thrum-mats with a new, shorter curing process:

- The new process saves money.
- We have the resources in place to implement the new process.
- We can use the new process while maintaining thrum-mat quality.

We have the resources in place to implement the new process:

- We have facilities that can accommodate the new process.
- Our people have the necessary skills to run the new process.

Deduction 

*A is True.. B is True... C is True...
therefore we believe X.*

Induction 

We believe X because of reasons A. B. C.

- Induction allows you to be flexible.
- Control how much detail to provide.
- Putting the conclusion in the beginning also passes the elevator test.

Buy In

Pre-wire

- Pre-wire Everything
- Avoid surprises
- Tailor to the audience
- Adapt depending on audience reaction
- Flexible and respectful of the audience
- Small audience... maybe print out..

Features throughout the Presentation

- **Hypothesis-driven framing:** “We believe the biggest opportunities lie in X, Y, and Z.”
- **Benchmarking & proprietary IP:** “Our global benchmarks show...”
- **Crisp visuals:** 3 - 5 bullets per slide, value-driver trees, MECE logic.
- **Tone:** Professional, confident, not over-promising.

Proposal

1. Executive Summary

- **Purpose:** Persuade the client within 1 page (or 1 - 2 slides). It reframes their challenge and demonstrates credibility.
- **Client Challenge (1 - 2 sentences) :** The urgent problem, framed clearly.
- **Insight (1 - 2 sentences) :** A unique observation from benchmarks or prior work.
- **Proposed Solution (3 - 4 bullet points):** High-level phases.
- **Expected Impact:** Quantified benefits (financial + strategic).
- **Example:** *Client X faces rising input costs (12% CAGR) while revenue has plateaued. Without intervention, margins risk declining 400bps within 18 months. XYX Consulting experience in 120+ cost transformation programs highlights that 60 - 70% of this erosion can be avoided through strategic sourcing and pricing redesign. We propose a 10-week diagnostic and roadmap to deliver \$80 - 120M EBITDA uplift and a 2 - 3% market share gain.*

2. Client Context & Problem Statement

- **Purpose:** Demonstrate that *XYX Consulting* understand the client's *business, industry, and pain points*.
- **External Forces:** Market trends, regulatory shifts, competitor behaviour.
- **Internal Challenges:** Strategic, Operations, Financials, Organisational, Culture.
- **Why Now:** Timing, urgency, risks of inaction.
- **Use facts & charts** ("Margins have eroded by 350bps since FY20; 2 of 3 competitors have outperformed client's EBITDA growth since 2022"). Strategic importance of addressing the problem.
- **AS-IS Process Model** (BPMN, pain points, KPIs)

3. Objectives & Success Criteria

- **Purpose:** Define what winning looks like.
- **Strategic Objectives:** Growth, profitability, risk mitigation, transformation.
- **Operational Objectives:** Process improvements, digital enablement.
- **Capability Objectives:** Building skills, knowledge transfer.
- **KPIs:** Concrete, trackable metrics.
- **Example:**
 - *Increase market share in the premium EV segment from 8% → 12% by 2026.*
 - *Reduce supply chain costs by 15% within 12 months.*
 - *Embed AI-powered demand forecasting capability into the client planning team.*

4. Proposed Approach

- **Purpose:** Show a clear, structured, hypothesis-driven path.
- **Guiding Principles:** Client-centric, fact-based, capability-building.
- **Frameworks Used:** MECE, value-driver tree, digital maturity model, growth pathways.
- **TO-BE Process Model** (BPMN, KPIs, Efficiencies)

5. Proposed Methodology

- **Phases (with weeks):**
 - *Diagnostic (Weeks 1 - 3):* Map current state, baseline KPIs.
 - *Design (Weeks 4 - 6):* Prioritise value levers, create roadmap.
 - *Pilot (Weeks 7 - 9):* Test 1–2 initiatives.
 - *Scale-up (Weeks 10+):* Final plan + capability transfer.
- Visualise as a **3-box timeline** with icons.
- Digital Transformation 3-box timeline
 - **Box 1 Short Term (0–6 months) - *Stabilize***
 - Conduct an IT infrastructure audit.
 - Migrate 20% of workloads to the cloud.
 - Launch employee digital skills program.
 - **Box 2: Medium Term (6–18 months) - *Scale***
 - Implement an enterprise-wide CRM & data analytics platform.
 - Automate key back-office processes (finance, HR).
 - Expand digital sales channels (e-commerce, mobile app).
 - **Box 3: Long Term (18–36 months) - *Transform***
 - Develop AI-driven decision support systems.
 - Fully digitise the supply chain with IoT integration.
 - Launch new digital products and services.

6. Work Plan & Timeline

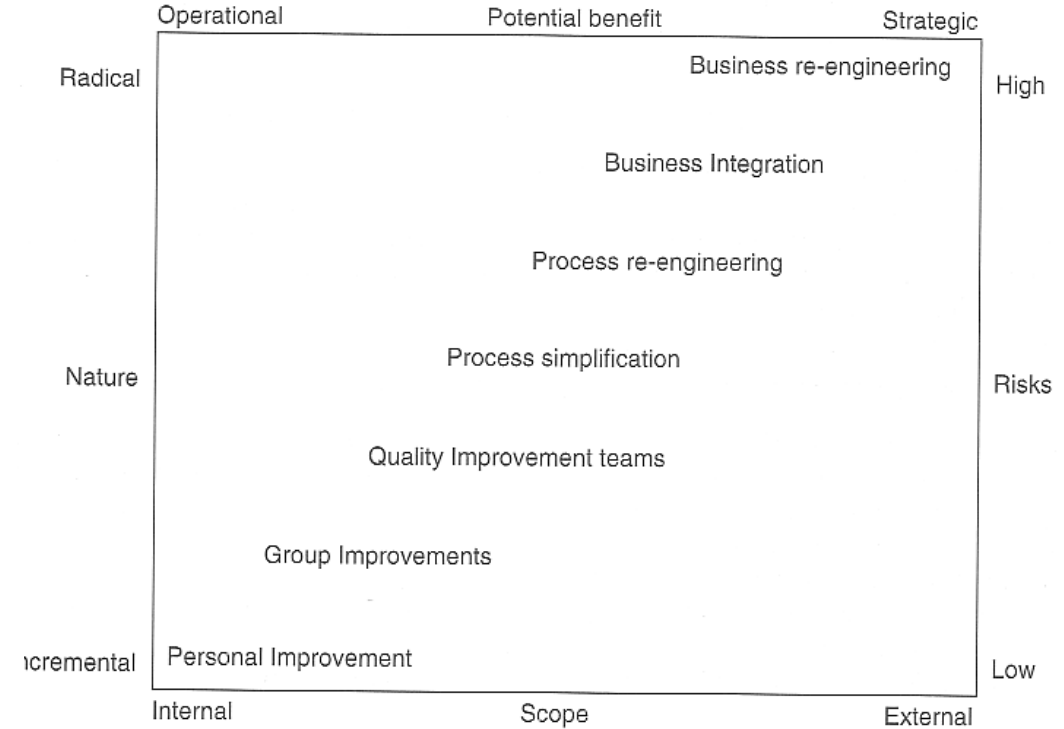

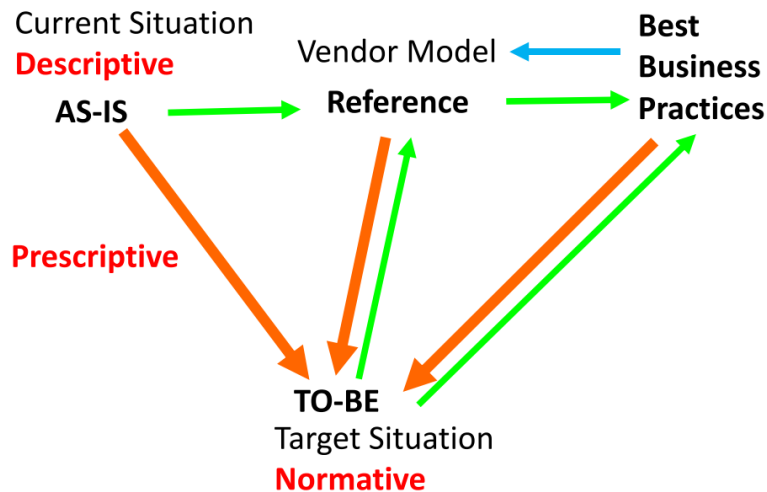

- **Purpose:** Build transparency and confidence.
- **Week-by-Week Plan** with deliverables.
- **Key Milestones:** Steering committee reviews, workshops, interim deliverables.
- **Governance Model:** Sponsor, steering group, working team.

Week	Activities	Deliverables	Key Client Involvement
1 - 2	Data collection, stakeholder interviews	Baseline assessment	Data provision, exec interviews
3 - 4	Market & competitor benchmarking	Benchmark report	Steering committee review
5 - 7	Option design, scenario modeling	Value lever framework	Working session with CFO
8 - 10	Roadmap & capability plan	Final playbook	CEO sign-off workshop

7. Team & Capabilities

- **Purpose:** Build credibility and trust.
- **Engagement Partner:** Oversees project, relationship.
- **Engagement Manager:** Day-to-day leadership.
- **Associate/Analysts:** Data, modelling, research.
- **Specialists:** Industry or digital experts.
- Short bios with **headshots, roles, and relevant past client impact.**

8. Change Management

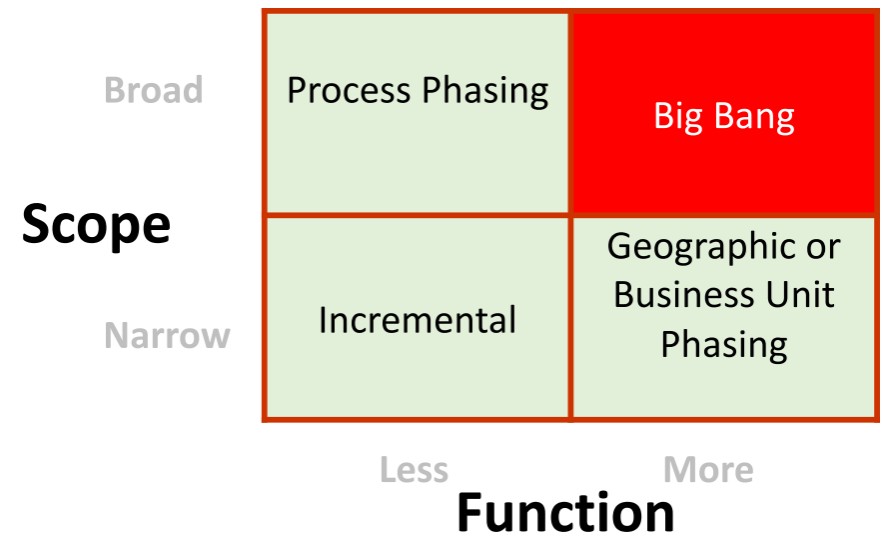

The Process Lifecycle

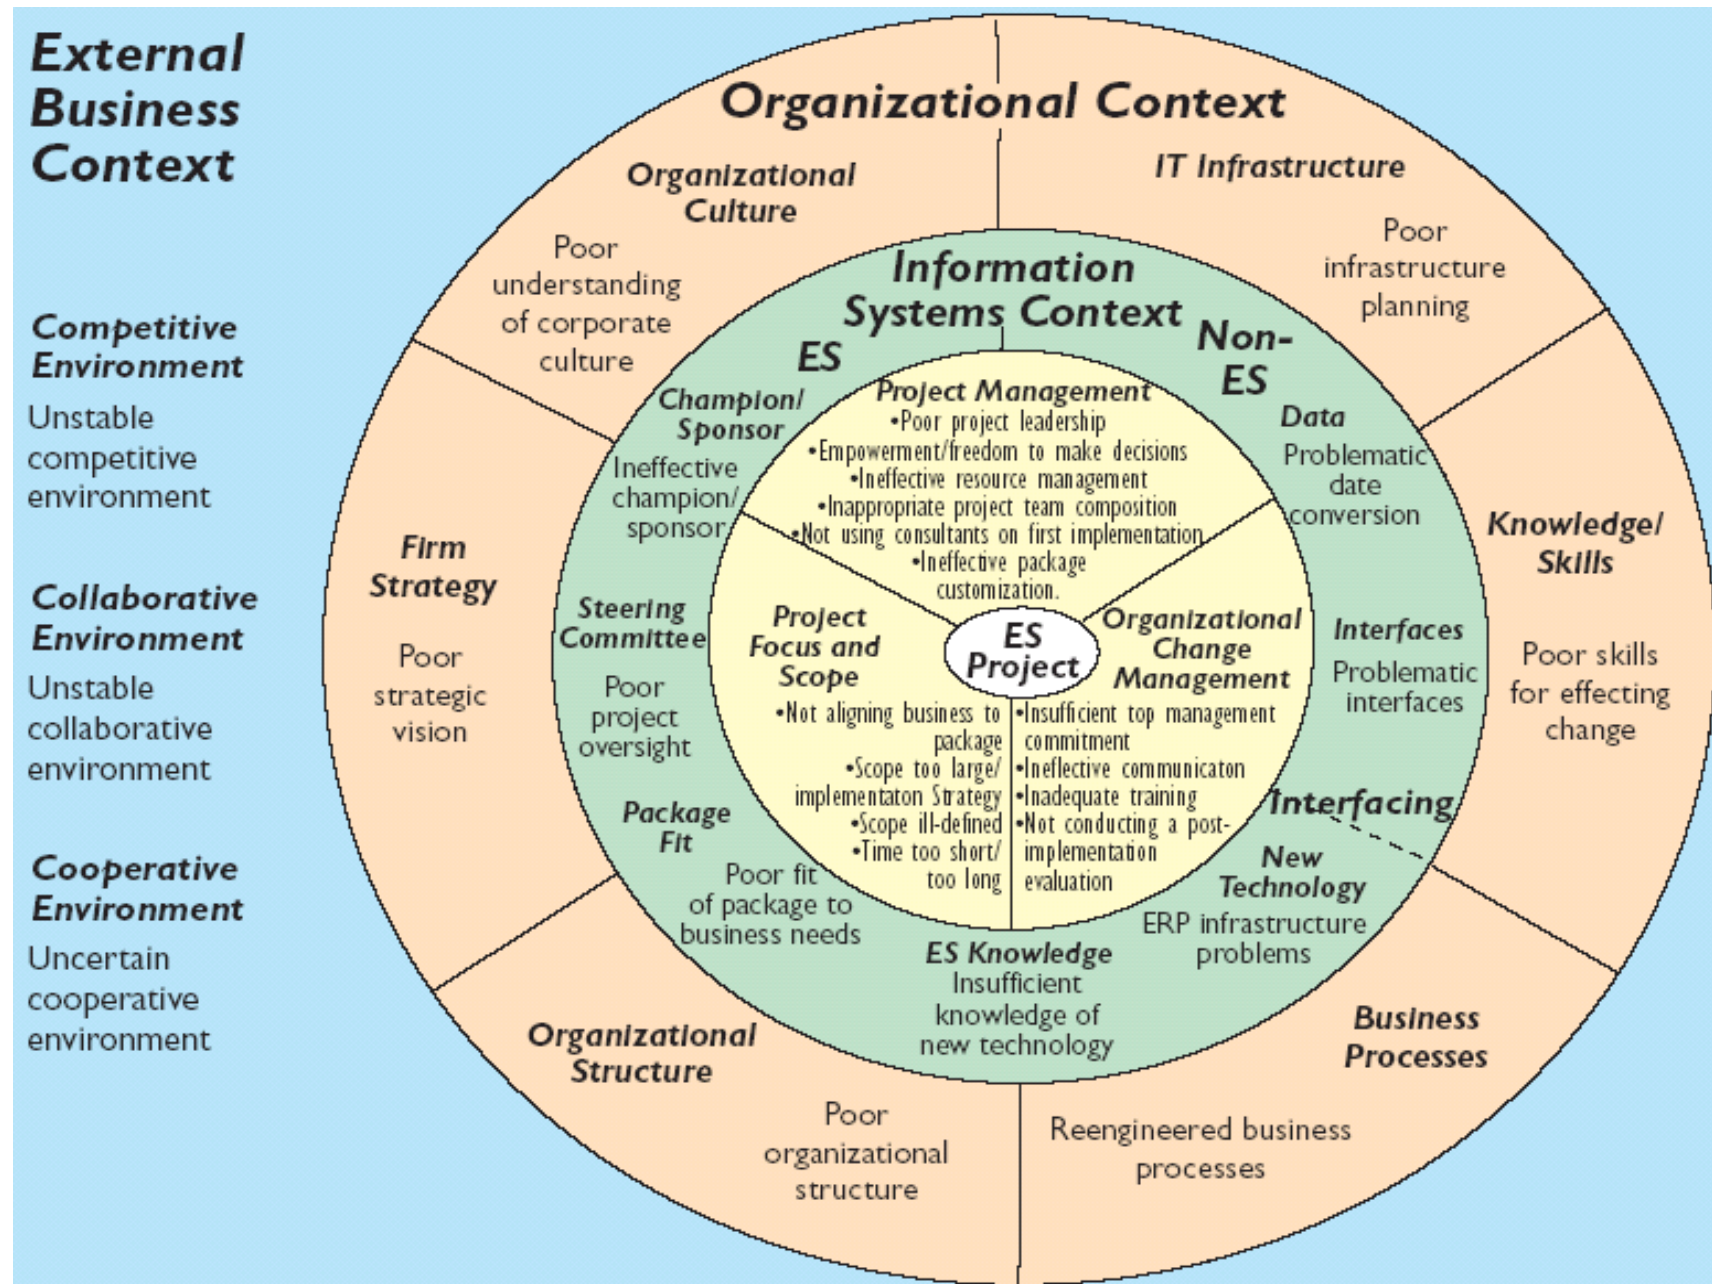

- Understanding the Business
- Process identification
- Process modelling (as-is)
- Process analysis
- Process improvement (to-be)
- Process implementation
- Process execution
- Process monitoring/controlling

Rosemann (2001)

9. Risk Management

- **Risk Register:** Description, mitigation strategy, RAG status

10. Expected Impact and Value Creation

- **Purpose:** Justify investment with quantifiable upside.
- **Financial Impact:** Savings, growth, ROI.
- **Strategic Impact:** Market leadership, resilience, innovation.
- **Capability Impact:** Knowledge transfer, systems, cultural change.
- **Scenarios:** Conservative vs. aggressive estimates.
- **Example:**
 - *EBITDA uplift: \$120 - 150M (within 18 months).*
 - *Market share growth: +3 - 5%.*
 - *Time-to-market reduction: 30%.*
 - *Cost-Benefit Analysis – breakdown of costs, quantified benefits, ROI/ payback period.*

11. Client Responsibilities and Collaboration Model

- **Purpose:** Clarify joint ownership.
- **Client Roles:** Data access, SME input, decision-making.
- **Joint Activities:** Workshops, steering meetings, and co-created deliverables.
- **Knowledge Transfer:** Training, embedding tools.
- “We work *with* you, not *to* you” → emphasise partnership.

12. Commercials / Fees & Terms

- **Purpose:** Be clear, while keeping fees at the *end*.
- **Fee Structure:** Time & materials, fixed fee, performance-based.
- **Breakdown:** By phase or by team level.
- **Expenses:** Reimbursable at cost.
- **Payment Terms:** E.g., 30 days, milestone-based.
- Position fees relative to **value created** (“\$1.2M in fees, against projected \$80 - 120M uplift”).

13. Next Steps

- **Purpose:** Maintain momentum.
- **Immediate Actions:** Sign-off, kick-off scheduling, and data sharing.
- **Proposed Kick-off Date:** Specific week.
- **Client Options:** Scaled engagement (full, pilot, or quick diagnostic).
- **Example:**
 - *Kick-off workshop: Week of Oct 14.*
 - *Data request list: Sent within 48 hours of approval.*
 - *First Steering Committee: Scheduled for Week 2.*
