

用真实例子开场（听众立刻听懂）

Example: Countdown / Woolworths supermarket

例如：Countdown/Woolworths 超市

- ② “Imagine a Countdown supermarket receiving a shipment of 500 items.
“想象一下，Countdown 超市收到了一批 500 件商品。
The invoice says 500, but after checking, the staff only find 497.
发票上写着 500，但工作人员核对后发现只有 497。
No one knows whether the supplier didn’t send them, whether the driver misplaced them, or whether the store simply forgot to record them.没有人知道是供应商没发货，还是司机弄丢了，又或者是商店忘记记录了。
And all of this matters because inventory, invoicing, and payment all depend on accurate tracking.”
这一切都很重要，因为库存、发票和付款都依赖于准确的跟踪。

引出核心问题

- ② “This happens because many organisations still rely on manual processes to track what was delivered, when, and where.”
“这种情况的出现是因为许多组织仍然依赖人工流程来跟踪交付了什么、何时交付以及在哪里交付的。”

清晰描述问题点

- ② Barcode numbers, serial numbers, branch names, and dates are recorded manually.条形码编号、序列号、分行名称和日期均需手动记录。
- ② Data becomes inconsistent, incomplete, or incorrect.
数据变得不一致、不完整或不正确。
- ② Reconciliation between deliveries and invoices is slow and error-prone.
交货单和发票之间的核对速度慢且容易出错。

后果

- ② Missing items缺失物品
- ② Incorrect invoices发票错误
- ② Delayed payments延迟付款
- ② Inaccurate financial reporting不准确的财务报告
- ② Lower operational efficiency运营效率降低
- ② Loss of customer trust失去客户信任

为什么这是紧急问题

- ② For businesses with many branches or large inventories, even small tracking errors scale into major operational and financial risks.

对于拥有众多分支机构或大量库存的企业而言，即使是微小的跟踪错误也会累积成重大的运营和财务风险。

3. Know Your User (1 minute)

Customer (payer) 客户（付款人）

- ② Medium-to-large enterprises with multi-branch distribution:
拥有多分支机构的中大型企业：
retail chains, logistics companies, distributors, service providers.
零售连锁店、物流公司、分销商、服务提供商。

End Users (daily operators) 最终用户（日常操作人员）

- ② Warehouse staff 仓库员工
- ② Delivery teams 交付团队
- ② Branch/store managers 分店/门店经理
- ② Finance & reconciliation teams 财务与对账团队

Pain points 痛点

- ② Need fast, accurate receipt recording 需要快速、准确的收据记录
- ② Want to avoid manual paperwork 想避免手工文书工作
- ② Need visibility of missing/mismatched items 需要能够查看缺失/不匹配的物品
- ② Need reliable data that integrates with CRM/ERP 需要能够与 CRM/ ERP 系统集成的可靠数据

One-sentence user definition 一句话用户定义

- ② “Busy operational teams who need a simple, reliable way to track items across multiple locations.”
“繁忙的运营团队需要一种简单、可靠的方法来跟踪跨多个地点的物品。”

4. Market Opportunity (1—1.5 minutes)

TAM (总市场)

- ② ~US\$15B globally 全球约150亿美元
(33.4M companies × 15% multi-location × US\$3,000/year) (3340万家公司
× 15% 多地点运营 × 每年3000美元)

SAM (可触达市场—APAC)

- ② ~US\$3B 约30亿美元

SOM (第一年可获取)

- ② Targeting 2% of reachable users ≈ US\$60M 瞄准 2% 的可触达用户 ≈ 6000
万美元

CAGR (行业增长率)

- ② ~11% annual growth 年增长率约为11%。

小结一句

- ② Clear pain, clear users, and a large, fast-growing market.
明确的痛点、明确的用户群体以及庞大且快速增长的市场。
