物联网

AI AR

SG VR

可持续性 Sustainability

降低能耗

Reduce emission.

Maintain cost

medical, monitor patients

improve work safety

implementing

goal, case

AI + Blend physics

cross-disciplinary expertise

bias
people challenge algorithmic.

ownership,

question law.

question reality and to person.

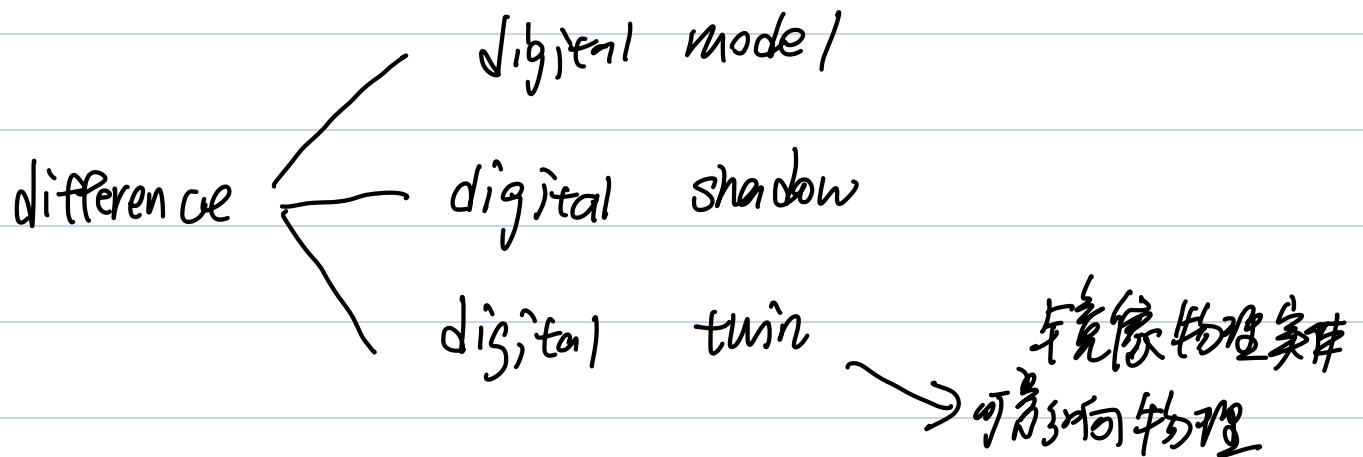

free will. 自由意志

consent 同意

will power 意志力

fundamental rights of digital person.

Digital Twins of Organization:

3 point

Science: Computational model of a system.

- ① agency, ② conflict ③ learning forgetting
- ④ net works of interdependent process
- ⑤ emergence.

computer Science: Technical hurdles → digital twin

information system:

history
can't achieve.
not work.
